

Your employees are your most valuable assets

– it is your job to always ensure correct working positions and keep their safety a top priority

We produce a wide range of ergonomic lifting products and tailor-made solutions for different handling situations. With the user in mind we develop solutions that ensure an ergonomically correct and well-organised workplace without compromising safety, quality or efficiency.

Take our Logitrans Highlifter with ergonomic handle and electrically adjustable height - all you need to protect the user and increase efficiency. You can also check out our add-on level control for maximum comfort.

With highlifters from Logitrans, you are always ensured ergonomically correct working positions.

Always think ergonomic and get fewer sick days

- Ensure space to move freely on the floor to avoid twisting of back and neck
- Adjust operating height to avoid bending of neck and lifting of shoulder and arms
- Ensure minimum distance between user and object to avoid unnecessary stretching
