

ALWAYS THINK FINISH

... and get higher cleanability

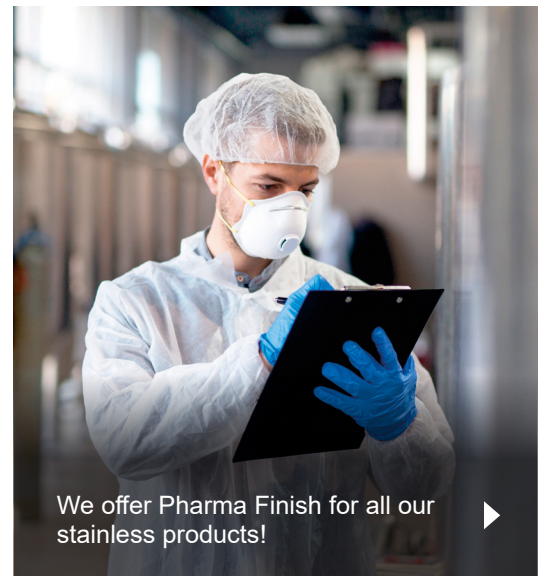

Production of your high quality products requires high hygiene

- our special option, Pharma Finish, enables high levels of cleanliness and sanitation

When you operate in dry environments, it is crucial that you are able to keep the surroundings clean without using water or chemicals. Pharma Finish helps you to ensure a high level of cleanability and to eliminate bacterial contamination.

Pharma Finish means that we make an EXTRA check, polish and finish of our stainless products. We have EXTRA focus on quality, design and finish during the whole manufacturing process. This concerns both welding, deburring and polishing of all sharp and pointed parts.

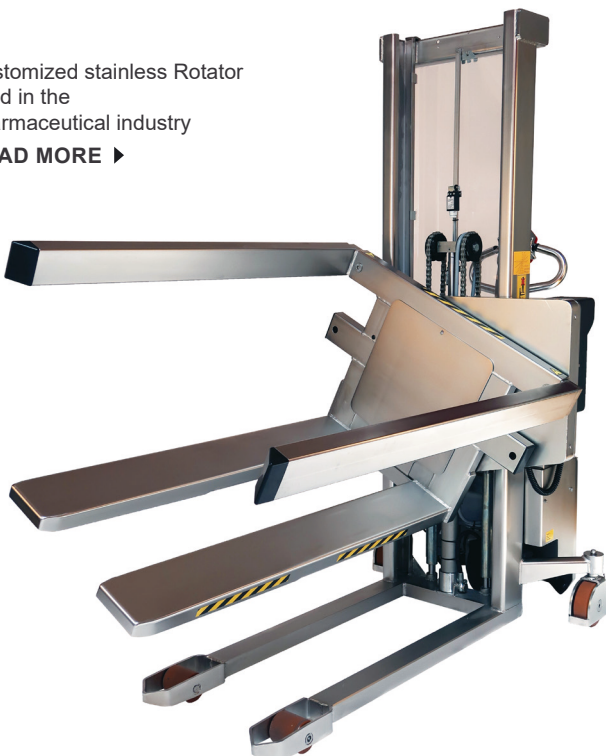

With Pharma Finish, you are always ensured the smoothest surfaces as well as rapid and effective cleaning

Facts about Pharma Finish

- No welding edges or splashes
- Sharp corners will be rounded, so that there are no sharp edges, on which you can get hurt while cleaning
- Roughness of main surfaces, which might come directly into contact with media, should be below 0.8 μm . No deposits may be formed which could impair product quality.
