RoHS SCOPE DECLARATION

Logitrans A/S manufactures material-handling equipment for professional use, including pallet trucks, high lifters and equipment for handling pallets, boxes and drums.

Logitrans hereby declares that products covered by this declaration fall outside the scope of Directive 2011/65/EU (RoHS), for the reasons set out below.

1. Manually operated equipment

Logitrans' manually operated products that do not depend on electric current or electromagnetic fields to fulfil their intended function do not constitute electrical and electronic equipment (EEE) as defined in Article 3(1) and 3(2) of Directive 2011/65/EU. These products are therefore outside the scope of RoHS.2. *Powered non-road mobile machinery professional use*

Logitrans' powered products which meet the definition of *non-road mobile machinery made available exclusively for professional use* in Article 3(28) are excluded from the scope of RoHS pursuant to Article 2(4)(g) of Directive 2011/65/EU.

The applicability of this exclusion is determined based on the design and intended use of the relevant Logitrans product.

Scope of this declaration

This declaration concerns the applicability of Directive 2011/65/EU to Logitrans products. It should not be interpreted as a declaration of compliance with the substance restrictions in RoHS for products that fall within the scope of the Directive.

Legal basis: Directive 2011/65/EU, in particular Articles 2(4)(g), 3(1), 3(2) and 3(28), as amended.

For and on behalf of Logitrans A/S
